**SEVEN FRIDAYS FOR PROFESSIONAL
FUTURE**

Curricular Traineeship Workshops

All second year MD students are called to the following workshops that will be held by professional experts of psychological intervention in the main contexts of clinical practice: private practice, public institutions, neurorehabilitation settings, communities and non-profit organizations, business companies, and educational institutions. An additional workshop will focus on ethical and deontological aspects of psychological practice.

All the workshops are an opportunity to orient students on potential intervention of the clinical psychologist as an expert in creating – within each specific context – relationships that activate reflective processes, meaningful changes and wellbeing. The clinical psychologist's possible positions will emerge from practical examples and experiences that students will confront with.

The internship projects in the host organizations available will also be presented to the students.
